

Blue Water Baltimore, like many of our customers, is concerned by the use of neonicotinoid pesticides and their effects on honeybee populations, as well as the potential connection to colony collapse disorder.

Our commitment at Herring Run Nursery is to use responsible, conscientious growing practices, and when necessary, biological controls, to address potential pest issues. We do not, and will not, use chemical controls of any kind at the Nursery. We limit our business to growers who are likewise committed to the use of sustainable green practices and have eliminated the use of neonicotinoids.

Should you have any questions or concerns, please let us know. We look forward to assisting you with all your native plant needs!

Regards,

Rob Jenkins
